## Electrical Engineering Scholarships: AST-CCs

PLC-Training.org is now accepting scholarship applications for the 2018-2019 academic year scholarship program.

**To help aid our efforts to improve the quality of automation training, we have developed the AST-CCs scholarship.**

The academic achievement required to gain scholarship consideration is submitting a 600 word or more paper. The subject applicant will be required to do internet research on, is the topic of new or future industrial automation technology. (As computer and internet literacy is essential to work with today's automation technology.) Ten full scholarships for a total of \$10,000 plus in education will be awarded. (Scholarship sponsored by Business Industrial Network and Koldwater.)

Courses these scholarships will fully fund are *(Each recipient receives all 7 independent study courses, courses in win pc software format.)*

...

- Motor Controls
- VFD Basics
- HMI Basics
- PLC Training
- Electrical and PLC Troubleshooting
- PAC Training
- DeviceNet Basics

Automation certificate courses above are delivered in interactive software course format to be installed on a Win PC operating system. So, recipient can take courses as pre-college preparation, during college or technical school for greater understanding. The automation course software never expires, so applicant can use again before a new job, as a refresher. (Details of automation courses this scholarship awards, can be found by following "Automation Technology Specialist's Bundle" link at [Automation Technology Courses](#).

3 Steps to win **Automation Specialist Training Certificate Courses Scholarships**:

1. [Apply](#).

2. Upon application approval, applicant will be emailed info to submit paper.
